Math can really amaze me. There are so many formulas and probably more to be discovered. This guy that adds and squares numbers in his head is amazing.

This demonstration just goes to show what a wonderful mind God gave to man and its possibilities. Math also demonstrates Gods order, preciseness and creativity. The more you study math, the more you learn about the awesomeness of God.

Arthur Benjamin is a Mathemagician. He has a book called "The Secrets of Mental Math." This could be a great book for education and entertainment.

Here is a great 15 minute video of Arthur Benjamin performing his mathemagic. Check it out!
